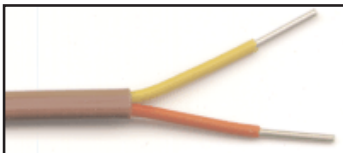
Dynatherm

Order Code **PP**

Jacket: PVC
Insulation: PVC
Continuous: 105°C
Single Reading: 105°C

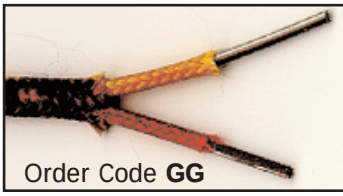
Features
- Excellent moisture resistance
- Good abrasion resistance
- Good chemical resistance



Order Code **TT**

Jacket: Teflon PFA
Insulation: Teflon PFA
Continuous: 260°C
Single Reading: 260°C

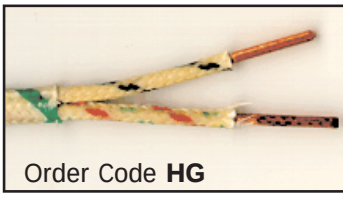
Features
- Excellent moisture resistance
- Excellent abrasion resistance
- Excellent chemical resistance



Order Code **GG**

Jacket: Fiberglass
Insulation: Fiberglass
Continuous: 480°C
Single Reading: 540°C

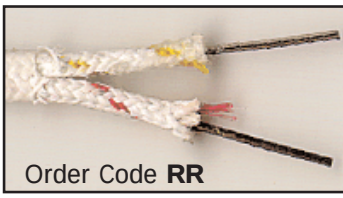
Features
- Good moisture resistance
- Fair abrasion resistance
- Good chemical resistance



Order Code **HG**

Jacket: High Temp. Fiberglass
Insulation: High Temp. Fiberglass
Continuous: 700°C
Single Reading: 870°C

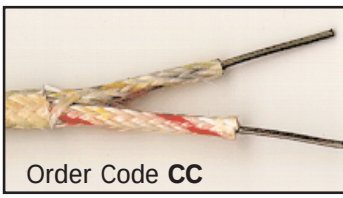
Features
- Good moisture resistance
- Fair abrasion resistance
- Good chemical resistance



Order Code **RR**

Jacket: Vitreous Silica
Insulation: Vitreous Silica
Continuous: 980°C
Single Reading: 1090°C

Features
- Fair moisture resistance
- Fair abrasion resistance
- Good chemical resistance



Order Code **CC**

Jacket: Ceramic Fiber
Insulation: Ceramic Fiber
Continuous: 1200°C
Single Reading: 1300°C

Features
- Fair moisture resistance
- Good abrasion resistance
- Good chemical resistance

Ordering Information

K 2 0 - 1 - G G - S
① ② ③ ④ ⑤

① Wire Calibration
For standard grade use single letter (Ex. K, J, T...)
For special limits use double letters (Ex. KK, JJ, TT...)
For extension grade use double letter (Ex. KX, JX, TX...)

② Wire Gauge
Use standard American Wire Gauge (AWG) numbers.

③ Wire Construction
Use 1 for solid conductors and 2 for stranded conductors.

④ Insulation Type
Select insulation type from table above.

⑤ Metal Covering
Use S for stainless steel overbraid and 0 for none.
